About Us

Electrician Courses 4U specialise in providing the very best electrical training and electrical training courses for complete newcomers to the industry, or for those with industry experience who wish to further their existing skills and knowledge of particular regulations. If you are considering a career change, it's important to acquire the correct industry qualification, which is where EC4U can give you the help you need.

Our tutors are highly experienced electricians, and have each undertaken teaching and assessing training, gaining the qualifications needed to deliver the highest possible standard of electrical training. Our staff bring their extensive trade experience to the classroom, allowing them to relate real-life scenarios in an accessible and patient manner, and focus on exactly what each student needs to help them advance and pass the courses.

Find out more, [CLICK HERE>>](#)

“ I'm delighted with the new skill set I have acquired and am now much more confident about the future.

Why Us?

Beginning a new career is a huge decision and one that deserves careful consideration. If you wish to pursue a profession as a Domestic Electrician, EC4U can assist you in every step to reaching your goal.

- ✓ We pride ourselves on a 98% average pass rate on all training course
- ✓ Our courses are ideal for newcomers or those looking to re-train
- ✓ There are no hidden costs, plus we offer price match and pay-as-you-train deals on selected courses
- ✓ We provide a unique 'Experience Week' training course to support your electrical qualifications and give you DIY know how
- ✓ Small class sizes for a better learning experience
- ✓ Aftercare support and specific business & marketing advice

Find out more, [CLICK HERE>>](#)

“The guys at EC4U made things easy with their professionalism, sense of humour and experience.”

Our Premises

Real-Life Training House

Fully Constructed 'Training House' to give you experience in real life electrician scenarios and prepare you for your entering the industry.

Spacious Classrooms

Our classrooms & exam suites are fitted with modern projector and IT systems. Class sizes are kept small to provide a good teacher-to-customer ratio.

Large Workshops

Spacious workshops and training bays for a better practical learning experience and comfort throughout your entire training at EC4U.

Convenience

Refreshment facilities with a dedicated customer kitchen, ample customer parking and local cafeteria within minutes walk.

Domestic Electrician Course

15 Days

£1,800 incl. VAT

C&G

Who is this course for?

This is our most popular electrician course and was designed for people with little or no experience who are looking to become a Domestic electrician. With these course qualifications you will be able to apply to join a Government approved part p scheme provider and certify that your work complies with up to date building regulations. If you are new to electrical installation work and want to get qualified quickly then this is the course for you.

Course overview

Key Stage Electrician Course - (Duration 5 Days)

This course was designed specifically for people with little or no experience of electrical work who are looking to either pursue a career as an electrician (self-employed or employed), combine it with an existing trade or to undertake your own property renovations. We will show you how to install electrical circuits inside and outside of properties and equip you with the essential knowledge and skills required to complete our Domestic Electrician Course.

Part P Course City & Guilds 2393 - (Duration 2 Days)

This Part P course will deliver an excellent understanding and working knowledge of the Building Regulations which have been in place since the 1st January 2005. Part P of the Building regulations is specific to electrician's safety within domestic dwellings and covers the dos and don'ts we must follow as domestic Installers when working in somebody's house.

17th Edition Wiring Regulations 2008 City & Guilds 2382 - (Duration 3 Days)

The objective of this course is to give you an excellent understanding of the current wiring regulations that electricians

need to follow when doing any electrical installation work. This qualification is essential to be able to apply and join a government approved Part P competent scheme.

Level 2 Inspection and Testing City & Guilds 2392 - (Duration 5 Days)

In this course we will show you how to inspect and test any new or altered electrical circuits starting with dead tests to prove it is safe to turn the power back on and then live tests to prove that the circuits are safe and meet current wiring regulations criteria. You will then be shown how to complete the required paperwork (Schedule of Test Results) that needs to be left with the consumer unit/fuse box to comply with Part P of the Building Regulations.

Duration

This course consists of four separate courses and will last 15 days. The core course times are Monday - Friday 9:00 AM - 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

During this course you will take 3 multiple choice on-line exams and one practical assessment. For more detailed information on the exams and assessment please take a look at the individual course pages.

Course literature

The following publications are to be purchased by all customers wishing to take part on the Domestic Electrician Course.

- IET Inspection & Testing
- IET Wiring regulations 17th edition, on-site guide

You will then be shown how to complete the required paperwork (Schedule of Test Results) that needs to be left with the consumer unit/fuse box to comply with Part P of the Building Regulations.

Experience Course - (Duration 5 Days)

The objective of this course is to introduce you to additional elements that are essential on your journey to becoming an electrician and make you feel confident when you leave our training centre to tackle your first job. We will teach you how to quote for business and show you how long specific jobs should take so that you remain competitive but do not lose money. Also we teach and demonstrate all of the DIY associated with becoming a sparky from chasing walls through to fishing cables and it is all done in as real life scenarios as possible in our 2 flats and a 2 storey house (including loft) setup we have within our premises.

Duration

This course consists of five individual courses and will last 20 days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

17th Edition Training Course

3 days

£420 incl. VAT

C&G

Who is this course for?

The 17th edition course is ideal for newcomers to the electrical industry or also for those people wishing to update their existing qualifications. This is a must have qualification for anyone looking to become a competent domestic electrician. It's a short course which will teach you how to navigate your way around the Wiring Regulations book in preparation for the City & guilds 17th Edition exam.

Course overview

[Level 3 award in the requirements for electrical installations BS7671: 2008 \(2382-12\)](#)

[City & Guilds 2382-12 17th Edition course - \(Duration 3 days\)](#)

The objective of this 17th Edition course is to give you an excellent understanding of the current wiring regulations that electricians need to follow when doing any electrical installation work. This electrical qualification is essential to be able to apply and join a government approved Part P competent scheme. This electrician course is the most up to date 17th edition course, older courses including the City & Guilds 2382-10 and 2382-20 have been replaced with this course.

The 17th Edition 2008 BS7671 book consists of nearly 500 pages that we must comply with as electricians. Initially when you first look at the book it can appear quite frightening and difficult to interpret, however, after our 3 day course you will be able to navigate your way through the book with ease. As electrical training specialists, we will ensure you completely understand the key areas of the 17th edition book and how to reference it in preparation for the open book exam at the end of the course.

Our 17th Edition Course includes the following:

✓ Introduction to the City & Guilds 2382-12 electrical qualification and the reason for its existence

This part explains why we have regulations and outline the past. For example the 1st Edition of the regulations were

introduced on the 21st June 1882 and consisted of four pages. The regulations were introduced to coincide with the demise of gas lighting and the introduction of electric lighting. Today we are currently in the 17th Edition amendment number 2 and it now covers nearly 500 pages.

✓ BS7671 2008 structure and design and how to use it

We will give you a detailed understanding of the 17th edition book, how it is numbered, structured and how to successfully navigate your way around the book.

✓ Parts 1 through to 7

The 17th edition book consists of seven parts with the largest covering special installations or locations and the smallest being definitions. We will ensure that you understand how to reference all seven parts and appendices of the book in preparation for your exam on the last day of your course.

Duration

This course takes place over a 3 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

The exam for the 17th Edition electrical training course is taken online with 60 multiple choice questions. You will have 120 minutes in which to complete it. You are able to take your course book in with you as you will need to reference it to get the correct answers.

Course literature

The following publications are to be purchased by all customers wishing to take part on the 17th Edition Course.

Part P Training Course

2 days

£345 incl. VAT

C&G

Who is this course for?

This course is perfect for those wishing to undertake domestic electrical installation work and demonstrate that it complies with Part P of the building regulations. This course alone will not enable you to self-certify your own electrical work, however it is one course within our Domestic Electrician Course which will allow you to join a Part P scheme and self-certify.

Course overview

Part P Course - (Duration 2 days)

This Part P course will deliver an excellent understanding and working knowledge of the Building Regulations which have been in place since the 1st January 2005. Part P of the Building regulations is specific to electrician's safety within domestic dwellings and covers the dos and don'ts we must follow as domestic Installers when working in somebody's house.

Our Part P Courses includes the following:

✓ Legislation

Health and Safety, The Building Regulations, Approved Document P, Notification to building control and non-notifiable minor work.

✓ Design

Design of circuits, selection of materials and installation.

✓ Mains Position

Location, Supply systems, Earthing and Bonding, Labelling and Installing of Residual Current Devices.

✓ Circuit Specifications

standard circuits, final circuits, fused connection units, lighting circuits, Cooker circuits and water and space heating.

✓ Special Locations

Kitchens, Locations containing a bath or shower and outdoor lighting.

✓ Inspection and Testing

Inspection, Testing, operation of Residual Current Devices and Circuit breakers.

✓ Safety

Pre-Work Surveys and tests, safe isolation.

✓ All Parts of Schedule 1 relating to electrical work

Parts A,B,C,E,F,L,M,P.

✓ Government approved Part P Competent Scheme Providers

ELECSA, NAPIT, NICEIC

Duration

This course takes place over a 2 Days. The core course times are Monday - Friday 9:00 AM - 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

At the end of this City and Guilds 2393-10 Part P course you will have to take a multiple choice online exam which consists of 20 questions and you have up to 40 minutes to complete it. The good news is that you are able to take your course book in with you (Electricians Guide to the Building Regulations) as you are being tested not only on your knowledge but also your ability to reference the book to find the right answer.

Course literature

The following publications are to be purchased by all customers wishing to take part on the Part P Courses.

Level 2 Inspection and Testing Course

5 days

£550 incl. VAT

C&G

Who is this course for?

This City & Guilds Inspection and Testing Course will teach you how to safely Test, Inspect and verify newly installed or extended circuits. This course is ideal for newcomers who do not have any previous inspection and testing knowledge or experience and would like to add this valuable skill set to their qualifications portfolio.

Course overview

[Level 2 Inspection and Testing course](#) - (Duration 5 days)

In this course we will show you how to inspect and test any new or altered electrical circuits starting with dead tests to prove it is safe to turn the power back on and then live tests to prove that the circuits are safe and meet current wiring regulations criteria. You will then be shown how to complete the required paperwork (Schedule of Test Results) that needs to be left with the consumer unit/fuse box to comply with Part P of the Building Regulations.

Our Level 2 Inspection and Testing Course includes the following:

✓ General Requirements

Safety, Required competence, Certificate and Reports.

✓ Initial Verification

Purpose, Certificates, scope, Initial inspection, Initial testing, Electrical installation certificate, sequence of tests.

✓ Test Instruments

Accuracy, Low resistance ohmmeters, Insulation resistance ohmmeters, Earth fault loop impedance testers, Earth electrode resistance testers and Residual current device testers.

✓ Forms

Initial inspection and testing/ Minor works and Model forms for certification and reporting.

Duration

This course takes place over a 5 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

At the end of this City and Guilds 2393-10 Part P course you will have to take a multiple choice online exam which consists of 20 questions and you have up to 40 minutes to complete it. Key Stage Electrical Course

5 Days

£485 incl. VAT

EC4U

Who is this course for?

This course is ideal for people who have little or no electrical installation experience and are looking to become a domestic electrician. We have specifically developed this course to give you the best opportunity to pass your exams and assessments which will be required if you are to obtain the right qualifications and competency to become a domestic installer. If you want to know the basics before progressing further this is the course for you.

Course overview

[Key stage electrician course](#) - (Duration 5 Days)

Our EC4U Key Stage course was developed particularly for people with little or no understanding of electrical installations to give you the initial knowledge and skills required to become a Domestic Electrician. The course will provide you with crucial knowledge, skills and competency before taking additional courses that are needed to become a Domestic Installer.

Our Key Stage Electrical Course includes the following:

✔ Electrical Hazards

Safety, Electrical shocks Direct and indirect, Protection against shocks, Faults and fires.

✔ Basic Circuits

Consumer Unit, Circuit breakers, Main switches, Residual current devices, Conduit and Trunking.

✔ Correct Use of Electrical Tools

We will demonstrate throughout the week the correct way to use all the tools and Electrical testers.

✔ Preparation and use of cable

You will be shown the correct way to prepare your cables.

✔ Socket Circuits

Learn how to correctly install ring and radial socket circuits.

✔ Cooker Circuits

Let us show you and explain why these circuits use larger cable sizes.

✔ Outside Wiring

We will demonstrate the proper way to use Steel Wire Armoured Cable and let you have a go.

✔ Lighting Circuits

We will teach you a large range of lighting scenarios to include the following - Loop in, Junction boxes, one way, two way, intermediate, two gang one way, two gang two way.

✔ Consumer Units

Explain the design, operation and show how to correctly connect cables to them.

✔ Design of Circuits

Let us show you how to understand and design a circuit prior to installation and ensure that the circuit will operate safely and comply with BS7671 2008.

✔ Requirements for Earthing

Such an important piece to all electrical systems, let us show you why.

✔ Safe isolation

To ensure everyone is safe during any electrical work that you undertake we will show you how to safely isolate the electricity.

✔ Dead Testing of Circuits

Once the circuits have been installed it is essential for you to test all new or additions to circuits and record the results to prove they are safe before turning the power back on. Let us show you how.

Duration

This course takes place over a 5 Days. The core course times are Monday - Friday 9:00 AM - 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

This course does not have any exams.

Electrical Experience Course

5 Days

£500 incl. VAT

EC4U

Who is this course for?

This course has been designed specifically for people who would like additional practical experience to give them the confidence before entering into the market as a Domestic electrician. It offers a unique opportunity to undertake real-life projects within our purpose built apartments and 2 storey house setup. If you want to get top tips and advice from instructors with years of on-site experience then this is certainly the course for you.

Course overview

EC4U electrical experience course – (Duration 5 Days)

The objective of this course is to help you feel confident when you leave our training centre to tackle your first job. On this course you will be put into real life scenarios in our large workshops that contain 2 flats and a 2 storey house (including loft) setup to make your experience as realistic as possible. We also have our own installation company (Electrical Solutions 4U) so potentially there is also an opportunity to take you out on real jobs to gain invaluable experience.

We do not have a specific course structure that we stick to as we like to ask our customers which parts they would like to focus on so they get the most from the course. We want to give you what you need to feel confident when you leave us so come and make a few mistakes with us and not at your customer's house.

Our Experience Course includes the following:

✓ Quoting advice

Hourly rates, Job prices, Planning, Design, fixtures and fittings

✓ Installation of Circuits

Quote, Plan, Design, install both lighting and socket circuits for inside and outside scenarios

✓ Inspection, Testing and Certification

Test and inspect all of the circuits you have installed, fill out the correct documentation and ensure the results meet the regulations.

✓ Smoke Alarms and extractor fans

Design, Plan and install as per the building regulations.

✓ Spot Lights (Down Lighters)

Plan, Position and Install these popular lights.

✓ Correct use of Testers and Tools

Let us show you how to correctly use 17th Edition Multifunction testers and tools of our trade.

✓ DIY

Let us teach and show you the practical skills needed to be a Domestic Electrician.

✓ 3 Phase Supply

We will make you aware what to expect from a 3 phase electrical supply.

Duration

This course takes place over a 5 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

Level 3 Testing and Periodic Package

10 days

£995 incl. VAT

EAL

Who is this course for?

If you are looking to enhance your existing Inspection, Testing and Periodic skills, knowledge and qualifications then this course is the right one for you. The two courses combined are ideal for either existing electrical contractors with a good working knowledge of testing and inspection and those wanting to improve their current qualifications.

Course overview

The EAL Level 3 inspection, testing and periodic package - (Duration 10 days)

The EAL Level award has been put together to replace the old City & Guilds 2391 qualification which has now expired. It is an alternative qualification to the City & Guilds 2394 and 2395 courses. All the exams and assessments associated with the EAL courses are undertaken before you leave the training centre to give you the best chance of getting the result you deserve.

The objective of the course is to give you a good understanding of the theory/practices required to do both a periodic inspection and initial verification/commissioning of electrical installations. The course will improve both your inspection/testing and periodic skills and could lead to your JIB status as an approved electrician if that is a route required.

Our Part P Courses includes the following:

- ✓ Introduction to qualification
- ✓ Initial verification
- ✓ Inspection of installations
- ✓ Safe isolation and testing
- ✓ Certification

- ✓ commissioning
- ✓ Dead and live testing
- ✓ Testing of the installation
- ✓ Safety system
- ✓ Complete safe isolation
- ✓ Inspection and testing requirements
- ✓ Contrst of initial verification and periodic inspection
- ✓ Test results interpretation
- ✓ Completion of EICR reports

Duration

This course takes place over a 10 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

On the fifth day you will complete an EAL online multiple choice exam and do 4 practical assessments. The online exam is open book so you will be able to take your course book into the exam with you.

The Online exam will consist of:

55 multiple choice questions

The 4 Practical assessments will be:

Three phase installation commissioning assessment
Earth loop impedance testing assessment
Insulation resistance testing assessment
Initial inspection assessment

On the seventh day you will complete a further EAL online exam and practical assessments.

The Online exam will consist of:

35 multiple choice questions

The 2 Practical assessments will be:

Periodic inspection assessment
Periodic inspection and testing assessment

Course literature

The following publications are to be purchased by all customers wishing to take part on the Part P Courses.

- IET Requirements for Electrical Installations
- IET Wiring regulations 17th edition, on-site guide
- IET Inspection & Testing, guidance note 3
- NIC EIC Initial verification and certificatoin of electrical installations learning guide
- NIC EIC Periodic inspection, testing and certification of electrical installations

01444 872 145

www.electriciancourses4u.co.uk

Level 3 Inspection and Testing Course

5 days

£550 incl. VAT

EAL

Who is this course for?

If you are looking to enhance and improve your existing inspection and testing skills then this course is right for you. It is ideal for those who are existing electrical contractors who have a good knowledge of testing and inspection and those looking to improve on their current qualifications.

Course overview

EAL Level 3 Inspection and Testing course - (Duration 5 days)

The EAL Level 3 award in the initial verification and certification course has been designed specifically to follow BS 7671 (17th edition wiring regulations 2008), IET Guidance Note 3, the ESC'S (electrical safety council's) best practice guides and is an equivalent alternative to the City & Guilds 2394 course.

The objective of this course is to provide you with an understanding of the practices/theory involved in the initial verification and commissioning of electrical installations and will cover both single and three phase systems. The course will improve your electrical inspection and testing skills and give you an improved opportunity of employment.

We have chosen to deliver this Level 3 Award in the Initial Verification and Certification over the City and Guilds 2394 as you will be able to complete all of your practical and written/online exams at the end of your 5 day Course.

This is not the case with the City and Guilds where you will be required in the best case scenario to return to the training centre the following Wednesday or Thursday for the written exam after you have completed your course which potentially could cost you more money in travel, prove inconvenient and affect your ability to pass the exam (see City & Guilds examiners report).

The worst case Scenario could be that you wait up to 2 months after your course to complete the written exam as the Guilds only run them quarterly which could impact significantly upon your result. As the old training adage says "use it or lose it"! The EAL qualification is equally well recognised amongst the Government approved part p schemes as the City and Guilds and has been awarding qualifications since 1964

Our Level 2 Inspection and Testing Course includes the following:

- ✓ Qualification introduction
- ✓ Legislation
- ✓ Requirements of initial verification
- ✓ Safe isolation of both single and three phase systems
- ✓ Completion of certificates
- ✓ Inspection of installation
- ✓ Commissioning of system
- ✓ Dead testing practices
- ✓ Live testing practices
- ✓ Safe testing
- ✓ Safety of the system

Duration

This course takes place over a 5 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

At the end of this course you will take an EAL Online exam and complete 4 practical assessments.

The Online EAL Inspection and Testing Exam will consist of:

55 Questions which will be a combination of multiple choice and advanced questions.

The 4 Practical EAL Inspection and Testing assessments will be:

Initial Inspection
Insulation Resistance Testing
Earth Loop Impedance Testing
Initial Verification (Commissioning)

Course literature

The following publications are to be purchased by all customers wishing to take part on the Part P Courses.

- IET Requirements for Electrical Installations
- IET Wiring regulations 17th edition, on-site guide
- IET Inspection & Testing, guidance note 3
- NIC EIC Initial verification and certification of electrical installations learning guide

01444 872 145

www.electriciancourses4u.co.uk

14

Level 3 Periodic Inspection and Testing Course

5 days

£550 incl. VAT

EAL

Who is this course for?

If you are looking to improve your knowledge and understanding of Periodic Inspections then this is the course for you. It is suitable for those who are existing electrical contractors and have a good knowledge of inspection and testing and for those looking to enhance on their current qualifications.

Course overview

[EAL Level 3 Periodic inspection and testing - \(Duration 5 days\)](#)

The EAL Level 3 award in the periodic inspection, testing and certification course has been created specially to follow 17th edition wiring regulations 2008 (BS 7671), IET Guidance Note 3, the electrical safety council's best practice guide and is an excellent alternative to the City & Guilds 2395 course. The objective of the course is to give you a good understanding of the theory and practices required to do a periodic inspection of electrical installations and covers both single and three phase supply. The course will enhance your periodic electrical inspection and testing skills and give you better opportunities of employment.

We have decided to run the EAL Level 3 Award In the periodic inspection, testing and certification of electrical installations instead of the City and Guilds 2395 as there will be no need to return to the centre to complete your final written paper at a later date. With the EAL course all your online exams and practical assessments will be completed at the end of your 5 day course before you leave the centre. This EAL course is equally recognised nationally by all employers and Government approved part p scheme providers.

Our Level 3 Periodic Inspection Course includes the following:

- ✓ Qualification introduction
- ✓ Safe isolation of circuits
- ✓ Requirements of isolation and testing
- ✓ Differences between periodic inspection and initial verification
- ✓ Completion of periodic inspection paperwork
- ✓ Safe testing
- ✓ Interpretation of test results
- ✓ Completion of condition reports
- ✓ Live testing practices
- ✓ Confirmation of the safety of the system
- ✓ Inspection of the installation
- ✓ Testing of the installation

Duration

This course takes place over a 5 Days. The core course times are Monday – Friday 9:00 AM – 4:00 PM. Please take a look at our course FAQ'S for further course information.

The exam

On the last day of the course you will sit 2 EAL online exams and complete 2 practical assessments. Both of the online exams are open book and you will be able to take guidance note 3 into the exam with you.

Exam 1 will consist of:

35 multiple choice questions

Exam 2 will consist of:

35 multiple choice questions with advanced question types

The 2 Practical assessments will be:

Periodic Inspection

Periodic Inspection and Testing
